

KODAK Precise Lens

KODAK Precise® Progressive Lenses are an excellent choice for everyday wear. Clear viewing areas work together for a natural-feeling wearing experience while maintaining great individual performance.

Outstanding Design

KODAK Precise Lens is the first progressive design created with Signet Armorlite's proprietary Vision First Design™ Technology. This technology reverses the traditional design methodology of calculating the lens surface and measuring results. Instead, designers start by defining the optical properties that constitute superb vision and let those calculations determine the corresponding lens surface. This approach gives direct control of the curvature of the lens.

Premium Performance

The result, continuous power progression across the entire lens and smooth transition between viewing areas eases patient adaptation. Plus, the perfectly placed reading, intermediate and distance areas on the lens reduce swim effects. Some wearers compare their first KODAK Precise Lens experience to that of a single vision lens.

Additional binocular characteristics found in KODAK Precise Lens improve the visual balance of peripheral vision in both eyes. Wearers enjoy enhanced peripheral line integrity without experiencing a momentary blurry sensation.

Material Options

KODAK Precise Progressives will continue to be available in clear and Transitions® Gen8™ materials. Other materials with low usage are sold as available and will be eliminated later this year (* below).

All materials are compatible with major AR coatings.
