

**Easy to Dispense,
Easy to Adapt to.**

KODAK Precise PB Lens

Award-winning KODAK Precise® Lens in a precision backside design.

The viewing areas work together to provide the wearer:

- A more natural wearing experience with viewing zones perfectly placed to promote natural head and eye movement at distance and near
- Comfortable, clear vision where they need it most
- Smooth transition from one zone to the next reducing the blurring or “swim effect” for easy adaptation

**vision
first** 

KODAK Precise PB Lens uses Vision First Design™, proprietary technology that controls the surface power at virtually every point on the lens. The result is a smooth power increase across the entire lens, top to bottom.

KODAK Lens

Availability

- 2 corridor lengths to cover a wide range of frame sizes and prescriptions:
 - KODAK Precise PB with minimum fitting height 17mm for regular and large frames
 - KODAK Precise Short PB with minimum fitting height of 13mm for small frames
- Clear, photochromic, polarized, and blue light filtering lens options
- Covered by all major vision insurance plans
